

CENTURI

Seminar Series

Calendar

September 2020
June 2021

September

September 07 - External seminar: Raluca Eftimie (Dundee University, UK) - Using mathematical models to generate new immunological hypotheses: an investigation of immunotherapies for cancer

September 14 - Internal seminar: Michael Way (Francis Crick Institute, London, UK) - New levels of complexity in actin polymerization

September 30 - External seminar: Lisa Manning (Syracuse University, USA) - Predicting interactions between cell collectives and their environment

October

October 12 - External seminar: Kristian Franze (University of Cambridge, UK) - The physical regulation of axon development and regeneration

October 19 - Internal seminar: Elisabeth Rémy (I2M) - Logical modelling of biological networks

November

November 09 - Internal seminar: Alain Barrat (CPT) - Finding structures and timescales in temporal graphs

November 16 - Internal seminar: Réjane Rua (CIML)

December

December 07 - External seminar: Claude Loverdo (ENS Paris, France) - Interactions of antibodies and bacteria in the digestive tract

December 14 - Internal seminar: Rosa Cossart (INMED) - How development shapes memory circuits

January

January 25 - Internal seminar: Emilie Franceschini (LMA) - Ultrasound for probing and stimulating biological cells

February

February 01 - External seminar: Petra Vertes (Cambridge University, UK)

February 08 - Internal seminar: Juan Reguera (AFMB) - The physical basis of cell membrane remodelling by the Chikungunya virus

February 15 - External seminar: Sarah Filippi (Imperial College)

February 25 - External seminar: Manu Prakash (Stanford University, USA)

CENTURI

Seminar Series

Calendar

September 2020
July 2021

March

March 19 - External seminar: Arup Chakraborty (MIT, Boston, USA)

March 15 - Internal seminar: Philippe Roudot (I2M)

March 22 - External seminar: Virgile Viasnoff (ESPCI)

April

April 12 - External seminar: Primoz Zihel (University of Ljubljana, Slovenia)

April 19 - Internal seminar: Caroline Chaux-Moulin (I2M) - Formulation and resolution of inverse problems in signal and

May

May 3 - Internal seminar: Pierre Ronceray (CPT)

May 17 - Internal seminar: Thomas Lecuit (IBDM)

June

June 21 - Internal seminar: Léo Guignard (LIS)
